## **Sample Chunk clocks**

When your children are involved in the process it helps them want to use the system. Here is a chunk clock created by children for their family.

Here are two examples of simple chunk clocks.

Here is an example of a fancier chunk clock.

It doesn't matter what your chunk clock looks like as long as it works for your family. I worked with one family that figured out the main family chunks and then each child filled in spaces for themselves. They had a preschooler who worked with her mom, and they had a young boy and a couple of teens. This was a more complicated system, but it worked for their family.
